REQUIREMENTS FOR HOT WATER CONSERVATION REBATE

On January 12, 2004, the Goodyear City Council approved Ordinance 03-1925 which will, in essence, give a \$100 rebate to anyone who installs a hot water recirculating pump or point-of-service hot water heater in their home. This became effective 30 days after passage.

The primary requirements to obtain the rebate are as follows:

- Must fill out a Permit Application
- Applies to only residential buildings and includes apartments
- Applies ONLY to Goodyear water users (residents south of I-10) - LPSCO and Arizona Water users (all residents north of I-10) are not eligible at this time
- Only one rebate per building
- Rebates only to owner/occupants or landlords-not to a builder
- Permit will be required to install pump/heater and/or the electrical outlet
- There will be no fee for this permit
- Owner must present sales slip at time of permit application
- Pump/heater must be new and a "listed" product (such as "UL" approved) and must be installed as per its listing. Manufacturer's instructions must be present when the Building Inspector arrives to conduct the inspection.
- Must be installed by homeowner or licensed Arizona contractor
- Inspector will verify pump/heater is installed correctly. To call an inspector call, the Inspection Line: 623-32-3494.
- Upon approval, Building Safety will notify Finance which will issue the rebate within a "reasonable" time
- We cannot recommend or endorse pumps/heaters. Interested citizens can do a search on the Internet by typing in the words "hot water recirculating pump" and checking the results. Most home improvement stores also carry these devices.
- The City's maximum expenditure for this rebate program has been set at \$25,000 per calendar year. Rebates will be given on a first-come, first-served basis until the \$25,000 maximum cap is reached.
- This program will sunset on December 31, 2005.
- If a pump/heater was installed prior to the February 12, 2004 date and after August 11, 2003 (date of the first public Council Work Session) and the applicant still has the receipt, you may be eligible for the rebate if the pump meets all other applicable criteria.
